

Global Freshwater Systems Science Workshop

June 16th–17th, 2025

Stockholm Resilience Centre and online

Participants: Bhattarabhop Viriyaraj, Chelsea Kaandorp, Elina Paavonen, Elisabeth Kruger, Fernando Jaramillo, Heindriken Dahlmann, Juan Rocha, Lan Wang-Erlandsson, Lauren Seaby Andersen, Petr Vesnovskii, Romi Lotcheris, Ronit Bohra, Vajira Lasantha, Vili Virkki, Xander Huggins

Day 1 – June 16th – case study day

Zoom link for remote participants: <https://uef.zoom.us/j/62259938118>

Position paper document: [water resilience collective -- position paper](#)

Room: Holling

9:00–10:00 Greetings and getting started

- Welcoming greetings
- Introduction to workshop agenda
- Workshop goals for the two days of being together
- General feedback on case studies

10:00–12:00 Case study presentations

- Free format based on each group's working documents
- How the group has worked, what has been found out, and what have been the challenges in doing this

12:00–13:30 Lunch (self-paid)

13:30–15:00 Framing the overall perspective

- Brainstorming the paper's objective statement and research gap

15:30–17:00 Framing the overall perspective

- Clarifying the main novelties and contributions of the paper
- What overall message implication could the case studies contribute towards

17:00 Closing of day 1

19:30 Dinner at [Hermans](#) (self-paid)

Day 2 – June 17th – writing together day

Zoom link for remote participants: <https://uef.zoom.us/j/62259938118>

Position paper document:  **water resilience collective -- position paper**

Room: Meadows

9:00–12:15 Working together on the position paper [one online stream for all]

- Expanding argumentation underlying the objective statement
- Eliciting key points for the position paper to build writing on
- Discussing and co-contributing to the argumentative content and concepts of manuscript figures
- Identify main relevant literature to build on, and clarifying the novelty of this perspective with respect to these
 - a) cross-scalar social dynamics
 - b) sociocultural and Earth system dynamics
 - c) cross-scale interactions and teleconnections across system types
 - d) attempting to “recontextualize” global water
 - e) key terms/definitions

12:15–14:00 Lunch at [Kräftan](#) (self-paid)

14:00–16:00 Revisiting case studies based on thinking progress so far

- Returning to case groups to develop them further based the work so far
- Revisit/harmonize/co-contribute to the drawings/figures of case studies
- Progress towards unified representation of the different cases
- Feedback and discussion across groups

16:00–16:30 Next steps, final remarks and closing of the workshop

- Organising towards continued work on case studies and writing the position paper manuscript
